

Tent Seating Chart

This Chart is a guide for determining the amount of people each tent will seat. The following chart lists the amount of people a tent will seat and does not include room for extras such as a dance floor, bars, head tables, ect. If "extras" are needed, a larger tent would be needed. That size being the amount of guests plus the amount of "extras" you would like us to provide for your event. Please feel free to contact one of our Event Coordinators who would be happy to answer any questions you may have.
